

HEAVY-DUTY TRUCK CAB AIR

ENSURE A BETTER ENVIRONMENT FOR YOUR DRIVERS

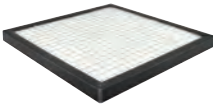

A trucker's job demands many hours behind a wheel, and for those long hauls, their truck is their home away from home. Because the majority of their time is spent inside the cab of a truck, it is important to provide a comfortable and safe environment.

Contaminants and pollutants in outside air can create unhealthy and unsafe conditions for drivers when not filtered out before entering the cab area. Allergies alone affect as much as 30% of adult population, causing health issues and lost work days. Avoid downtime and health problems by choosing the right cab air filter for your truck.

Baldwin heavy-duty cab air filters are designed to remove harmful contaminants and pollutants from the air before they enter the truck's cab area. Replacing cab air filters during regularly scheduled maintenance will help ensure the air is clean to breathe. Take care of your drivers with Baldwin cab air filters.
