É MAIS FILTRO

**Filtros Linha Leve**  
Filtros pelas ruas do mundo

**2016 | 2017**  
Catálogo de aplicação

### **Exclusividade para filtrar bem**

Blitz® é o elemento filtrante exclusivo Seineca, tratado, corrugado e plissado homogeneamente. Testado em laboratórios para assegurar máxima qualidade na retenção de impurezas e micropartículas para proporcionar um melhor rendimento do veículo e no ambiente, resultando em mais economia e segurança.

# Catálogo

- **S4** Sobre a fabricação de filtros Seineca
- **A9** Aplicação por montadora

## Tabelas de conversão

- **C39** Código Seineca para outras marcas
- **C47** De outras marcas para Seineca
- **C73** Código antigo para código novo

Seineca é uma empresa associada à Abrafiltros, grupo formado pelos principais fabricantes, empresas e distribuidores de filtros automotivos e industriais do país.

## Das nossas mãos para o mundo

### Sim, produzidos com qualidade na China

Uma das missões da Seineca tanto aqui no Brasil quanto lá fora é de acabar com o estereótipo negativo dos produtos chineses. Por um bom tempo as pessoas criaram repulsa aos conhecidos “xing-lings”, produtos de péssima qualidade e que até hoje existem devido a um grande número de clientes/marcas irem à China em busca do menor preço. Porém, ao olhar os produtos das grandes marcas líderes do setor eletrônico, automotivo ou vestuário, comprova-se o verdadeiro nível de qualidade e produtividade “Made in China”, determinada pelo cliente/marca, não pelo fabricante. A Seineca como marca e fabricante quer melhorar a imagem dos produtos chineses. Por isso, determina a qualidade das matérias-primas, produz e acompanha cada etapa até chegar ao consumidor final, apresentando produtos de qualidade e com preços competitivos.

### Definimos a escolha dos melhores materiais

Realizamos a inspeção das matérias-primas - principalmente no elemento filtrante - que compõem os nossos produtos. Contamos com um time de especialistas técnicos focados em melhorias constantes das matérias-primas.

### Máximo controle no processo produtivo

Certificação do ISO TS16949. Desde 2008, a fábrica Seineca segue o sistema padrão de qualidade da IATF para a concepção/desenvolvimento, produção de produtos automotivos.

### Tecnologias para abastecer o mundo

Investimentos em maquinários modernos são realizados constantemente para garantir a integridade de cada produto, para aumentar nossa capacidade produtiva e de controle a fim de abastecer imediatamente os distribuidores espalhados entre os 48 países que atendemos.

## Filtros de ar: Menos impureza no ar, mais eficiência do motor

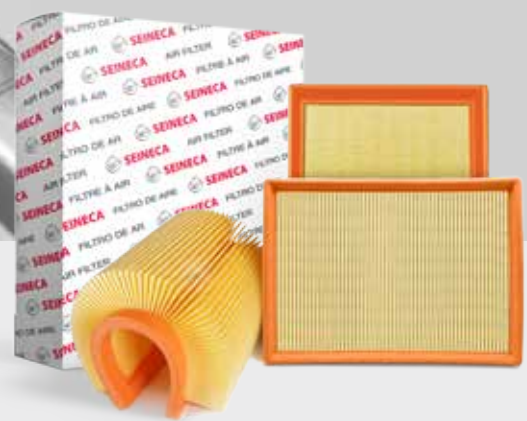

### Códigos para filtros de ar

SAF - Filtro de ar

SAR - Filtro de ar radial

### Produzidos em uma climatização adequada

Os filtros de ar Seineca são produzidos com materiais de alta qualidade e precisão em condições ideais de temperatura. Com isso seus elementos mantêm a flexibilidade e a expansão controlada, garantindo maior proteção para o motor. Dessa forma evita o comprometimento da área de filtragem, em detrimento de rebarbas desnecessárias e sobras extras sobre o meio filtrante. Esse diferencial Seineca garante uma redução de até 20% do excesso de poliuretano (PU).

### Corpo em PU: Poliuretano flexível

O corpo do filtro é elaborado em poliuretano sob condições ideais de temperatura, o que garante melhor flexibilidade e expansão. Planejado e estruturado para que o motor trabalhe em sua potência máxima, mantendo sua conservação e emitindo cada vez menos poluentes. Máxima filtragem, melhor performance e menos poluentes.

### Formatos exatos para fácil aplicação

Os filtros de ar Seineca são feitos com medidas exatas, dentro do padrão das montadoras, que facilitam a aplicação na bandeja. Não é preciso força, basta encaixar. Contamos com um time de especialistas técnicos que supervisionam cada etapa de produção, garantindo os parâmetros precisos que o mercado exige.

## Filtros de cabine / ar-condicionado

### Filtros fabricados com mais porosidade, maior adsorção

Os filtros Seineca com carvão ativado possuem macro, meso e micro poros que aderem moléculas insolúveis de forma instantânea.

Com isso, as micropartículas de gases e líquidos são retidas com toda eficácia. Além da filtragem de elementos sólidos e partículas finas respiráveis, os filtros de cabine Seineca com elementos de carvão ativado removem gases nocivos, odores desagradáveis e altas concentrações de ozônio. A alta porosidade e a grande área de superfície com um adsorvente 100x mais poroso que o carvão comum, asseguram uma melhor qualidade do ar dentro do veículo, mesmo ao trafegar por locais com muita poluição.

### Localize a posição do filtro de cabine para aplicação

#### Abaixo do capô

- A** Lado do passageiro
- B** Centro
- C** Lado do motorista

#### Porta-luvas

- D** Atrás do porta-luvas à esquerda, com a chave apropriada, desparafuse e retire o porta-luvas. Abra o compartimento do filtro posicionado ao lado esquerdo.
- E** Abaixo do porta-luvas à direita, nas posições F e G, não é necessário retirar o porta-luvas.

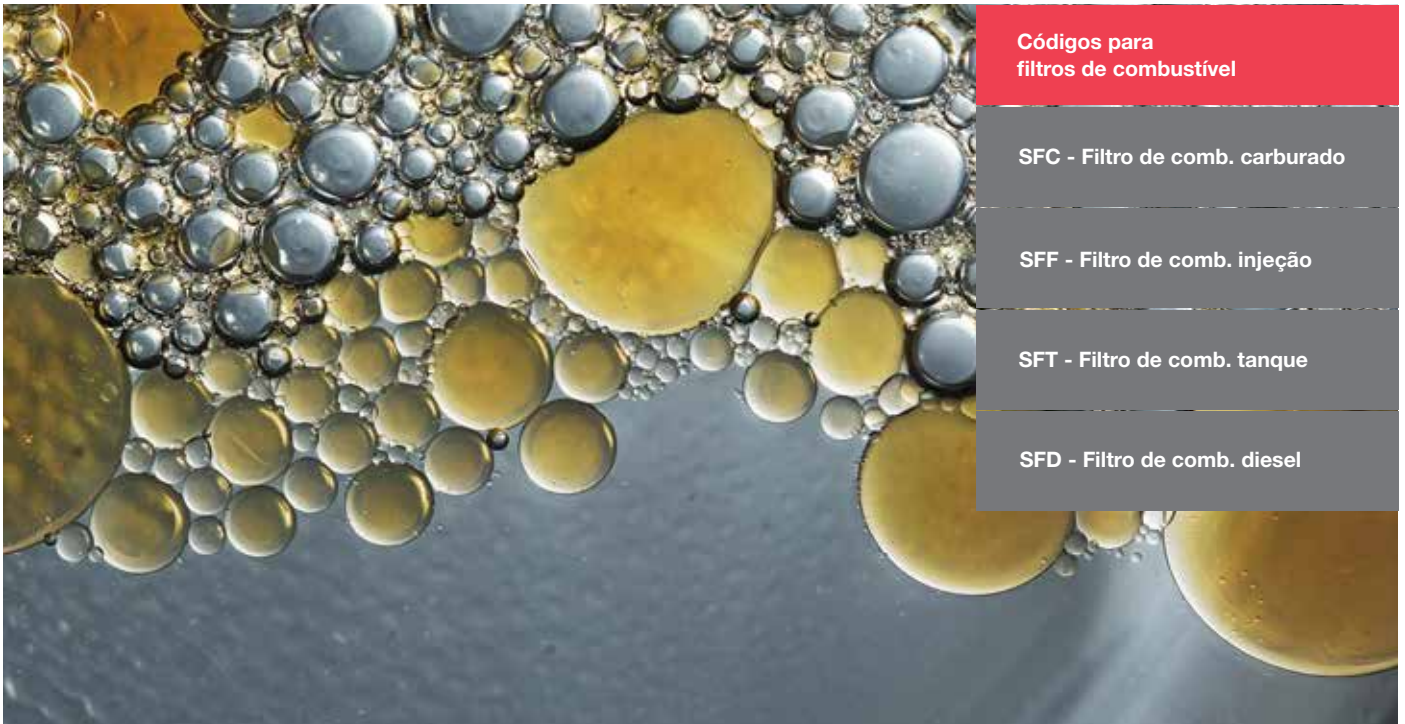

- F** Abaixo do porta-luvas à esquerda

#### Painel

- G** Abaixo do painel, perto do acelerador.

## Filtros de combustível

Códigos para  
filtros de combustível

SFC - Filtro de comb. carburado

SFF - Filtro de comb. injeção

SFT - Filtro de comb. tanque

SFD - Filtro de comb. diesel

### Combustível limpo, maior proteção do motor

Pureza, proteção, qualidade, limpeza, alto desempenho. Essas palavras combinam muito bem quando o veículo tem um eficiente filtro de combustível Seineca. Esse componente é vital para carros à gasolina, álcool ou diesel, que funcionam tanto com sistema de injeção eletrônica ou motores carburados. Sabemos que o combustível contém impurezas e água que podem danificar o motor, caso não seja devidamente filtrado. Os filtros de combustível Seineca separam de forma segura o combustível de partículas indesejáveis, garantindo um combustível limpo e homogêneo para seu veículo. Evite danos por corrosão e desgaste do sistema de combustível. A Seineca tem o filtro de combustível para proteger os veículos.

### Tipos de filtros de combustível

Facilitamos a identificação dos filtros de combustível atribuindo três letras iniciais para cada tipo de filtro de acordo com a aplicação.

- **SFC - Filtro de combustível carburado**
- **SFF - Filtro de combustível injeção**
- **SFT - Filtro de combustível tanque**
- **SFD - Filtro de combustível diesel**

## Filtros de óleo lubrificante

### Códigos para filtros de óleo

SOF - Filtro de óleo blindado

SEF - Filtro de óleo ecológico

SMF - Filtro de óleo multi

### Excelência e qualidade em materiais de alta precisão.

A sólida experiência da Seineca na produção de filtros permite criar produtos com materiais de alta qualidade em todos os modelos da linha: Multis, Específicos e Ecológicos. Seja para veículos leves ou pesados, você encontra toda a excelência em filtros de óleo adequados às suas necessidades. Otimizar a eficiência do motor é primordial para um alto desempenho do seu veículo. O filtro de óleo Seineca é parte fundamental neste processo ao reter todo tipo de impurezas que podem comprometer a qualidade e performance do óleo que circula no motor.

### Identificação fácil dos filtros de óleo

A nova embalagem vem com o código do filtro localizado em todas as faces da embalagem e até mesmo na tampa. Cada tipo de filtro possui três letras iniciais para facilitar a identificação do modelo do filtro.

#### Elemento filtrante

Blitz® é o papel exclusivo Seineca, tratado, corrugado e plissado homoganeamente. Assegura um motor com menos desgastes precoces e proporciona um melhor rendimento do veículo, resultando em mais economia e segurança.

#### ProFlow® Suporte de metal tubular

Projetado para suportar maior fluidez, facilita a passagem do óleo filtrado.

#### Válvula de segurança

Mesmo quando ocorre a saturação do papel a válvula de segurança permite que o motor continue lubrificado, liberando a passagem do óleo não filtrado.

#### Válvula de retenção ou anti-retorno

Mantém de forma eficiente o óleo no interior do filtro, permitindo uma lubrificação instantânea no momento da partida.

## Aplicação por montadora

## Programas de garantia Seineca

### Programa de Garantia Acelerada (PGA)

No programa de garantia acelerada os produtos dentro do período de garantia serão analisados em um processo mais simples e toda substituição será feita de forma imediata desde que toda documentação esteja correta. Todo processo é realizado através do site.

### Programa de Garantia Técnica (PGT)

O processo de garantia técnica ocorre quando há solicitação de ressarcimento de danos. A Seineca enviará um representante para uma verificação inicial do produto e dos danos. O produto será avaliado tecnicamente juntamente com todas as documentações.

#### Para mais informações:

Tudo sobre compras e garantia: [www.seineca.com/br/suporte](http://www.seineca.com/br/suporte)

Fale com um dos nossos representantes: [www.seineca.com/br/business/rep](http://www.seineca.com/br/business/rep)

Outros questionamentos, solicitações ou sugestão, ligue: **(21) 3590-7878** (Seg a sexta, das 9 às 18 horas)

Acompanhe nossas atividades no facebook: [facebook.com/seineca](https://facebook.com/seineca)

#### Consulta online

Para mais aplicações realize uma consulta online através de **Catálogo Seineca Online**.

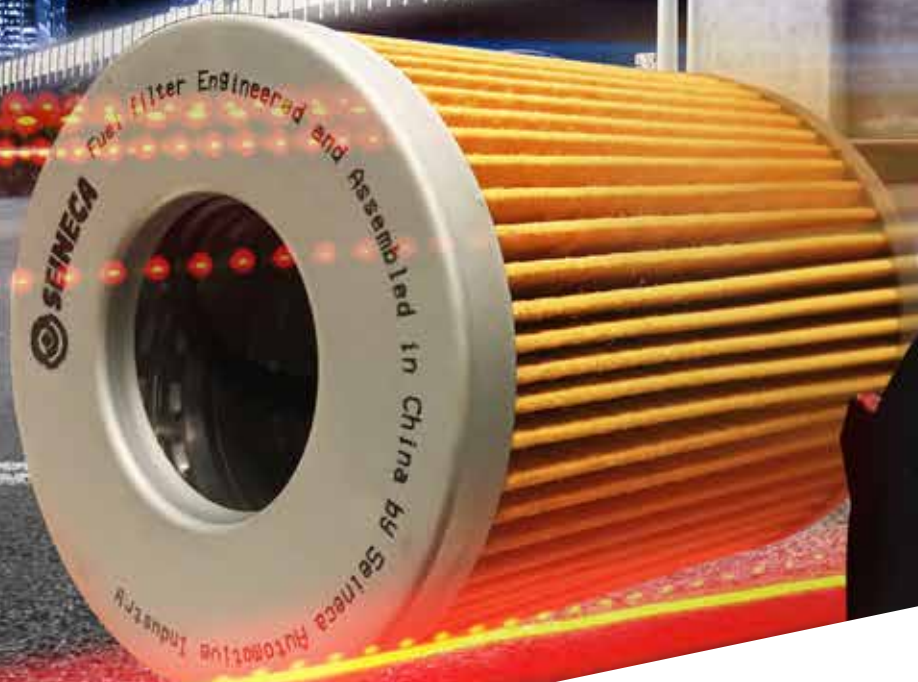

- Acessível em todas as plataformas.
- Disponibilidade dos produtos.
- Dados técnicos dos produtos.
- Painel exclusivo para gerar lista/catálogo próprio.
- E muito mais.
