

# WEGA

ORIGINAL QUALITY

*Calidad Superior*

*Catálogo de  
Filtros 2013*

**R. Neto S.A** es una compañía autopartista fundada en 1969, con sede en la Ciudad Autónoma de Buenos Aires, Argentina, titular de la marca WEGA para toda Latinoamérica.

Nuestra producción y comercialización esta dirigida al mercado de reposición para automóviles, utilitarios, camiones, maquinaria agrícola y vial, vehículos GNC y motos, abasteciéndolos con una amplia gama de productos: **Bujías, Filtros, Lámparas, Bocinas, Fusibles y otras autopartes.**

En nuestras tres plantas ubicadas en, San Justo (en una planta de 7000 mt<sup>2</sup>); Zona Franca La plata y Capital Federal, trabaja una dotación de más de 150 empleados entre operarios, técnicos y profesionales, desarrollando las operaciones de producción, logística, comercialización y administración.

Son plantas equipadas con modernas instalaciones que brindan un adecuado marco laboral, con las condiciones correspondientes de seguridad y tecnología de punta que nos permiten innovar y responder con velocidad a las exigencias del mercado.

Nuestra empresa tiene certificado su Sistema de Gestión de Calidad bajo la **Norma ISO 9001 versión 2008** con el BVQI "Bureau Veritas Certification" cuyo alcance se extiende a: "Fabricación y comercialización para el mercado de reposición de filtros para aceite, aire y combustible, componentes y accesorios; filtros de habitáculos, bujías de encendido y precalentamiento, lámparas y bocinas para automotores".

Para la comercialización contamos con una extensa Red de Distribuidores que cubren todo el territorio Argentino, exportando también al MERCOSUR y a otros países del mundo, ofreciendo garantía por nuestros productos y brindando un servicio de atención al cliente y postventa acorde a nuestras políticas de calidad.

Así mismo, y debido al suceso de nuestra actividad, la empresa también cuenta hoy con 2 filiales en Brasil ubicadas en Recife y Camboriú, participando activamente en ese mercado.

Nos esforzamos porque **WEGA** se ubique como una marca líder de calidad internacional entre los principales medios y eventos del sector; con un Manual de Identidad visual Corporativa y Packaging de vanguardia, y con la convicción de apoyar constantemente a nuestros distribuidores, fuerza de ventas y clientes, mediante cursos de capacitación e identificación publicitaria en los puntos de ventas.

---

*R. Neto S.A. is a spare parts company funded in 1969, with headquarters in Buenos Aires, Argentine, owner of the WEGA brand for all Latin America.*

*Our production and commercialization is directed to the automotive aftermarket, utilitarian, trucks, agricultural and road machine, GNC vehicles and motorcycle, supplying them with a large range of products: spark plugs, filters, lamps, speakers, fuses and other spare parts. In our three plants located in San Justo (it is a 7000 mt<sup>2</sup> plant); Free Zone La Plata and Capital Federal, work more than 150 employees between operators, technicians and professionals, developing the operations of production, logistic, commercialization and administration. They are plants with modern installations which give a suitable work space; with the correspondent safety conditions and technology which allows us innovate and reply quickly to the market exigencies.*

*Our company has its Quality Management System under norm ISO 9001 version 2008 with the BVQI "Bureau Veritas Certification" scope of supply: "Manufacture and aftermarket sale of oil, fuel, air and cabin filters, components and accessories, spark plugs, glow plugs, automotive bulbs and horns"*

*For the commercialization we counted with an extensive distributor network who cover all Argentinean territory, from Jujuy to Tierra del Fuego, export also to the MERCOSUR and other countries, offering warranty for our product and a custom services and post-sell services according to our quality policy.*

*Because of our activity, today we also count with two subsidiaries in Brazil, located in Recife and Camboriú, participating actively in that market.*

*We effort positionate WEGA as international leader quality between the principal media and sector events; with a vanguards Manual of Packing and Corporative Visual Identity, and the conviction of support constantly to our distributors, sells force and customers, through capacitating courses and identifying advertising in sell points.*

## Filtros para Aire / Air Filters

---

Una limpia admisión de aire es esencial para la conducción libre de problemas. Sin embargo, contaminantes como partículas, hollín, etc. ingresan con el aire. El resultado: partículas sucias entran en la cámara de combustión, causando fisuras y corrosión prematura en el motor. Componentes electrónicos tales como sensores que están ubicados entre la admisión y la cámara de combustión son dañados o incluso destruidos.

Los filtros de aire Wega pueden asegurar una limpia admisión de aire, debido al uso de un papel filtrante de altísima calidad. Los filtros de aire Wega permiten la óptima composición de la mezcla aire / combustible y aseguran una performance consistente del motor. Por lo tanto, con filtros de aire de alta calidad, el motor puede obtener un bajo consumo de combustible y el más alto poder de reacción.

Los filtros de aire Wega también disminuyen el ruido de la admisión y controlan la regulación de temperatura y sellado de los componentes adyacentes.

*A clean air admission is essential for a free problem driving. However, pollutants as particles, soot, etc enter with the air. The result: dirty particles enter into the combustion chamber, causing fissures and premature corrosion in the engine. Electric components such as sensors which are located between the admission and the combustion chamber are damaged or even destroyed.*

*Wega air filters can ensure a clean air admission, due to they are manufactured with filter paper of the high quality. Wega air filters allow the optimal composition of the air / fuel mix and ensure a performance consistent with the engine. So, with high quality air filters, the engine can get both low fuel consumption and the highest reaction power.*

*Wega air filters also decrease noise during the admission noise and control the temperature regulation and seal of the adjacent components.*

## Filtros para Aceite / Oil Filters

El hecho crítico para la correcta operación del motor es mantener limpio el aceite de lubricación, y asegurar que no haya impurezas corrosivas en el aceite de lubricación. Como resultado de la combustión, partículas de suciedad y residuos de la combustión tales como el hollín escapan dentro del aceite del motor. Ellos contaminan el aceite y lo hacen más viscoso. Esto significa que el aceite que provee no es adecuado y la protección contra la corrosión no puede ser asegurada por largo tiempo. Como resultado, la performance del motor es perjudicada y el consumo de combustible se incrementa. En el peor de los casos el motor podría dañarse. Incrementando la performance del motor y al mismo tiempo reduciendo el consumo de combustible se generan altas demandas en la construcción de motores. Solo el aceite limpio puede asegurar que la performance del motor permanezca consistente.

Por usar papeles filtrantes especiales, el filtro de aceite Wega puede asegurar la buena performance del filtrado. Las impurezas en el aceite lubricante puede ser removida efectivamente, y la máxima eficiencia de filtrado y el mínimo agotamiento del motor puede ser alcanzado, y así el tiempo de vida del motor puede ser prolongado.

*The critical fact for the correct engine operation is to keep the lubrication oil clean and ensure that there are not corrosive impurities in the lubrication oil. As a result of the combustion, dirty particles and combustion waste as soot escape inside the oil of the engine. They contaminate the oil and becoming it more viscous, that means that the oil (which provides) is not suitable enough and the protection against corrosion can not be ensured for long time. As a result, the engine performance is affected and the fuel consumption increases. In the worst case the engine could be damaged. Increasing the engine performance and reducing the fuel consumption at the same time, high demands on engine building are generated. Only the clean oil can ensure that the engine performance remains consistent.*

*By using special filtering paper, Wega oil filters can ensure a good filtering performance. The impurities in the lubricating oil could be removed effectively, and the maximum filtering efficiency and the minimum motor burnout could be reached, and the engine lifetime prolonged.*

## Filtros para Combustible / Fuel Filters

El combustible limpio es un requisito básico para una motorización libre de problemas. El combustible llega al sistema de inyección o al carburador por la bomba de combustible. El factor clave para el correcto funcionamiento del sistema de inyección es el combustible limpio con alta pureza. Pero también ocurre frecuentemente que las impurezas y contaminantes ingresan en el tanque de combustible cuando se carga el combustible. Por lo tanto, una alta performance del filtro de combustible para remover impurezas y contaminantes es una garantía para el seguro funcionamiento del sistema de inyección de combustible. Los sistemas de inyección modernos tales como comon-rail o bomba inyectora necesitan soluciones innovadoras sujetas al nuevo diseño. Los filtros Wega crecen con el desafío de todas las demandas hechas por la industria automotriz con un rango de filtros de combustible de altísima calidad.

Los filtros Wega tienen las siguientes funciones:

- Los filtros de combustible Wega proveen seguridad operacional para los motores.
  - Remueven del combustible los contaminantes no deseados como polvo, óxido y agua que pueden causar desgaste.
  - Protegen el altamente delicado mecanismo de inyección y el carburador.
  - Protegen el sistema de inyección de la corrosión.
- Para llevar a cabo estas funciones de forma confiable, los filtros necesitan ser de muy alta calidad.

*The clean fuel is a basic requirement for a free problem motorization. The fuel arrives to the injection system or to the carburetor through the fuel pump. The key factor for a right performance of the injection system is the clean fuel with high purity. But also, frequently happens that the impurities and contaminants enter into the fuel tank during the fuel load. So, the high fuel filter performance to remove impurities and contaminants is a warranty to ensure the safety of the fuel injection system function. The modern injection systems such as comon-rail or injector pump need innovative solutions subjected to the new designs. Wega filters grow up with the challenge of all the requirements by the automotive industry with a filters range of the highest quality.*

*Wega filters apply the following functions:*

- *Wega fuel filters provide operational safety for the engines.*
  - *Remove from the fuel non desire contaminants as dust, oxide, and water which can cause waste.*
  - *Protect the highly delicate injection mechanism and carburator.*
  - *Protect the injection system from the corrosion.*
- To complete these functions in trustable way, it is mandatory the use of filters of the highest quality.*

## Filtros para Habitáculo / Cabin Filters

---

El aire en las áreas urbanas contiene grandes cantidades de polvo, polen, hollín y otras partículas, como así también gases que son perjudiciales para la salud. Más y más personas están sufriendo alergias y están cada vez más concientes del tema del aire acondicionado y los filtros de habitáculo.

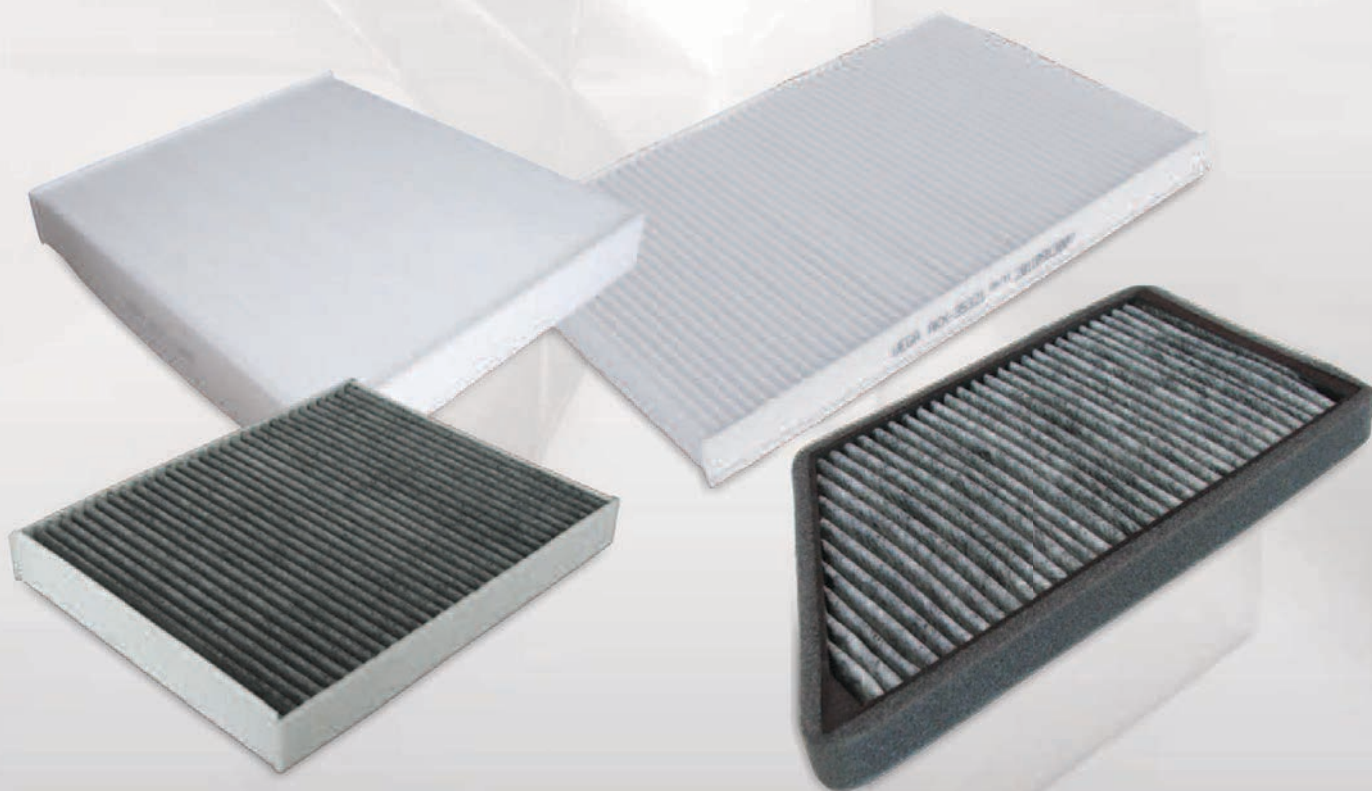

En Argentina, más y más vehículos son colocados con filtros de habitáculo como standard, y esa tendencia está aumentando. Los filtros de habitáculo originales Wega son muy altamente reconocidos por los fabricantes de vehículos locales y también por fabricantes extranjeros.

Los filtros de habitáculo Wega remueven el 99% del polen y otras partículas indeseadas, tales como gases perjudiciales del aire, asegurando así una mejor atmósfera dentro del vehículo. Esto es particularmente importante para las personas que sufren de alergias, asma y para los niños.

*The air in the urban zones contains big quantities of dust, pollen, soot and other particles, also gases which are harmful for the health. More and more people are suffering allergies and are now more conscious about the air conditioning problems and the cabin filters use.*

*In Argentina, more and more vehicles are ensambled with standard cabin filters, and this tendency is increasing. Wega original cabin filters are highly recognized by the local and foreign automobile factories.*

*Wega cabin filters remove 99% of pollen and other particles such us harmful gases of the air, ensuring a better atmosphere inside the vehicle. This is particularly important for the people who suffer allergies, asthma and for the kids.*

## Filtros Desecadores de Aire de Frenos / Brake Air Dryers

En el campo de la seguridad, los frenos están entre los componentes más importantes del vehículo, y el aire seco y limpio es particularmente importante para el sistema neumático de frenos en camiones y autobuses para proteger el sistema de la corrosión y el mal funcionamiento. Los secadores de aire Wega resuelven este problema. Estos filtros garantizan la mejor protección posible para los frenos teniendo en cuenta su excelente funcionamiento y calidad.

*In the security vehicle systems, brakes are among the most important components, dry and clear air is particularly important for the pneumatic brake systems of trucks and buses in order to protect such systems from corrosion and deficient performance. WEGA brake air dryers solve these problems. Our filters guarantee the best brake protection due to their excellent performance and quality.*
