

# HISTÓRICO NO BRASIL

No ano de 2003 a empresa instalou-se no Brasil e desde então está crescendo junto aos seus parceiros. Hoje, através de seus representantes, atende a distribuidores que chegam a todos os pontos do país. No momento, a Wega conta com dois centros de distribuição (CD) no Brasil, a Matriz que fica em Itajaí - SC, e atende às regiões Sul, Sudeste e Centro-Oeste e o segundo CD está localizado em Recife - PE, e atende ao Norte e Nordeste, e ainda um escritório comercial localizado em Santo André - São Paulo.

O atual CD em Itajaí é fruto do projeto Sede Própria, onde em 17.000 mil metros quadrados de área, foi desenvolvido um espaço que possibilitará a ampliação da linha de produtos, trazendo novos filtros da linha pesada e também da linha de motos, além do plano da construção da fábrica no país.

## CERTIFICAÇÕES DE QUALIDADE

ISO 9001

BUREAU VERITAS  
Certification

A empresa possui certificação em gestão de qualidade sob a norma ISO 9001, versão 2000 no BVQ! "Bureau Veritas Certification" que abrange: fabricação e comercialização de filtros de óleo, ar e combustível, componentes e acessórios. Comercialização de velas de ignição e aquecimento, lâmpadas e buzinas para automotores.

## HISTÓRICO NA ARGENTINA

A Wega Motors nasceu no ano de 1969 na Argentina com a fabricação de filtros de combustível para carros carburados. Na atualidade, a empresa tem mais de cem funcionários diretos. Sua comercialização chega aos diferentes locais do país e sua rede de distribuidores atende a todos os estados da Argentina.

Além disso, o Centro de Distribuição da Argentina, abastece também seus dois Centros no Brasil e em outros países.

# PRODUTOS

## FILTROS DE COMBUSTÍVEL

Os filtros de combustível para os carros com injeção eletrônica foram desenvolvidos para atender os diferentes tipos de motores, ou seja, gasolina, álcool ou os motores bi combustíveis, que combinam os dois primeiros. Os filtros de combustível para injeção eletrônica devem estar preparados para trabalhar com uma pressão maior que no caso dos carros carburados, e também devem estar preparados para lidar com as correntes estáticas, que colocam em risco o funcionamento do computador que controla o sistema. É por este motivo que os filtros da Wega são desenvolvidos em material metálico, ou no caso de serem plásticos, os mesmos são fabricados em plástico com carvão ativado, que permite lidar com os problemas das correntes estáticas. Continuando no caminho de antecipar as tendências do mercado, a empresa está desenvolvendo os filtros de combustíveis internos no tanque, tendência que está acontecendo principalmente nas marcas japonesas e coreanas.

A WEGA ajuda você a localizar o filtro de cabine do seu veículo

- A . ABAIXO DO CAPÔ (LADO DO PASSAGEIRO)
- B . ABAIXO DO CAPÔ (CENTRO)
- C . ABAIXO DO CAPÔ (LADO DO MOTORISTA)

- E** POR BAIXO DO PORTA - LUVAS  
Não é necessário retirar o porta - luvas.
- E1** POR BAIXO DO PORTA - LUVAS A ESQUERDA  
Não é necessário retirar o porta - luvas.
- D** POR TRÁS DO PORTA - LUVAS  
Desparafuse o porta - luvas e retire-o.  
Abra o compartimento do filtro, localizado do lado esquerdo, com a chave apropriada.
- F** POR BAIXO DO PAINEL PRÓXIMO AO ACELERADOR
- G** POR BAIXO DO PAINEL PRÓXIMO AO FREIO

## ELEMENTOS FILTRANTES ECOLÓGICOS PARA ÓLEO LUBRIFICANTE

Os filtros blindados e os elementos filtrantes tradicionais são produzidos com partes metálicas, os quais são mais resistentes. O inconveniente ecológico é que, uma vez que a vida útil do produto se esgota, ele é substituído. Devido a estes problemas ambientais existe uma nova tendência de elementos filtrantes ecológicos, sem partes metálicas. Neste tipo de filtro a Wega tem a linha mais completa do mercado, atendendo tanto aos veículos da linha nacional quanto aos importados.

## ELEMENTOS FILTRANTES DE CABINE

Os elementos filtrantes de cabine nasceram devido à grande necessidade de proteger a saúde das pessoas que se encontram no interior dos veículos, desde o momento que foi comprovado que o ar dentro dos mesmos está entre 3 a 6 vezes mais contaminado que o ar de fora.

A Wega está oferecendo ao mercado a linha de filtros de cabine mais completa, incluindo filtros para os veículos das linhas nacionais e importadas, com ou sem carvão ativado, e inclusive oferecendo filtros de cabine para caminhões e maquinários agrícolas.

Devido ao fato de ser uma linha de produtos que ainda não está explorada como poderia, pela falta de conhecimento com respeito à instalação do produto, estão sendo enviadas, dentro das embalagens, dicas de instalação dos filtros.

No caso dos filtros de cabine, a vida útil estimada é de 10.000 km ou um ano, o que acontecer primeiro. Mas pelo fato justamente de filtrar ar, esta vida útil poderá ser bem menor de acordo com o nível de poluição da região. Existem três sintomas que indicam que um filtro de cabine chegou ao final da vida útil: 1) odor desagradável, 2) falta de força no ar condicionado, 3) vidros embaçados com facilidade.

## FILTROS BLINDADOS PARA ÓLEO LUBRIFICANTE

A Wega conta com uma grande variedade de modelos de filtros, sempre respeitando a política da empresa de fornecer ao mercado a melhor opção para os diferentes motores, desenvolvendo os produtos em função do original, ao invés de produzir genéricos.

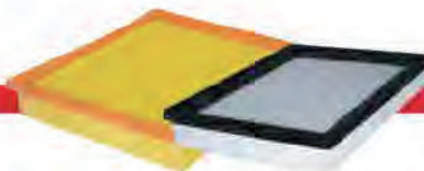

Para atender aos diferentes sistemas de filtragem, a empresa tem desenvolvido filtros de fluxo derivado, de fluxo total, de filtragem dupla, com derivação ao turbo, e filtros com e sem sistemas antidrenagem.

## FILTROS BLINDADOS E ELEMENTOS PARA DIESEL

Esta linha de produtos inclui filtros blindados, elementos, tanto com tampas metálicas quanto plásticas, sendo estes últimos conhecidos como ecológicos. A Wega tem uma ampla linha de filtros para pick-ups, utilitários, ônibus e caminhões.

## ELEMENTOS FILTRANTES PARA AR

Com a poluição, a degradação do ar aumenta a cada dia e faz com que seja necessário desenvolver uma tecnologia diferente, produzindo elementos filtrantes com maior eficiência e alto rendimento. Atendendo a estas exigências, a Wega tem uma linha completa de elementos que inclui filtros planos, redondos e tubulares de linha leve e pesada, além disso, comercializa todos os filtros com estrutura plástica e meio filtrante de feltro acompanhando a originalidade determinada pelas montadoras asiáticas.
